MODERN AMERICAN DESIGNS IN SARGENT HARDWARE

SARGENT & COMPANY
MANUFACTURERS
NEW HAVEN, CONNECTICUT

94 CENTRE STREET
NEW YORK

150 NORTH WACKER DRIVE
(AT RANDOLPH)
CHICAGO

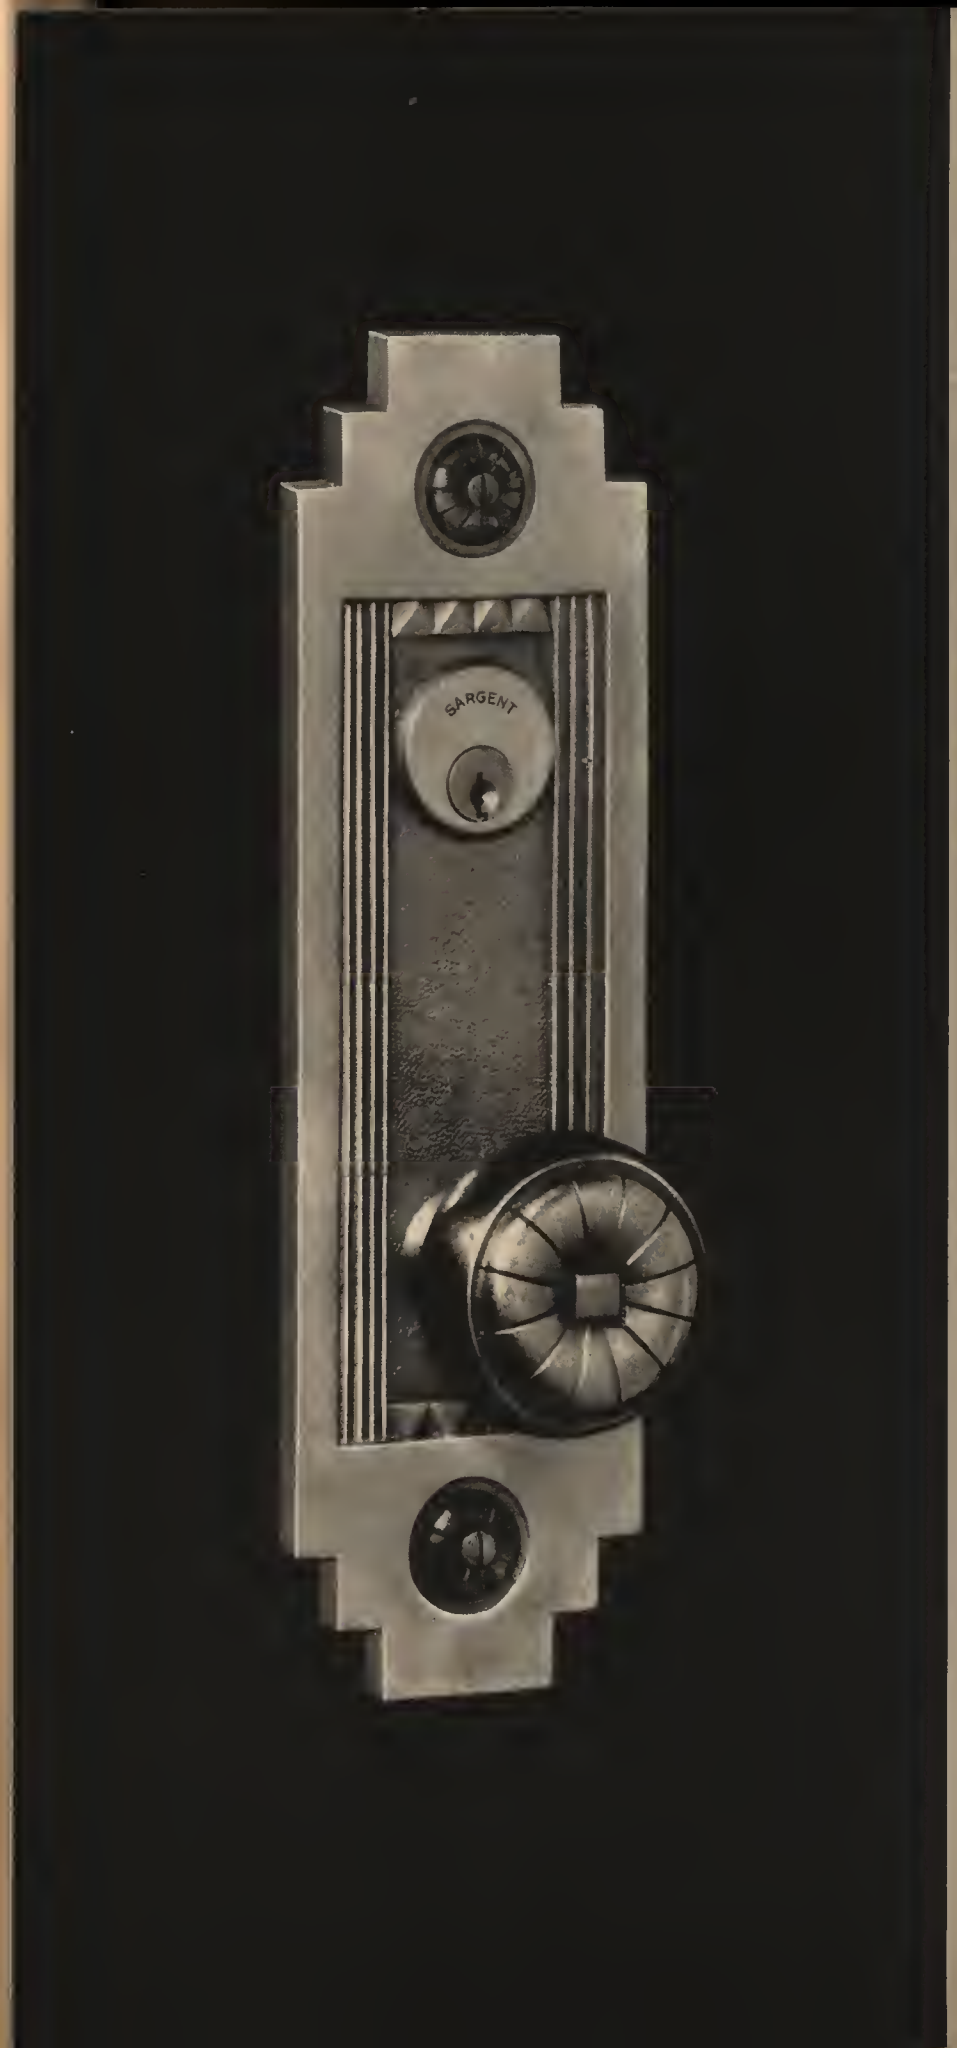

MODERN trends in architecture, particularly in the style and ornamentation of office and other commercial buildings, have brought about changes in the design of the materials that enter into their construction and equipment.

The new hardware illustrated in this pamphlet shows the influence of current thought in the architectural field. These examples of metal work produced by Sargent are characteristic of the movement away from traditional forms of artistic expression; they are appropriate for use in the buildings designed by progressive architects in a style that has not yet reached its fullest development. As new ideas in architectural form and expression develop, other hardware will be produced by Sargent to conform to the advancement of the times.

The designs in this pamphlet designated as proprietary were conceived by architects for individual buildings and are shown as examples of special work. The standard designs, which bear identifying trade numbers, are the work of Sargent designers and can be supplied for any building. All these designs have been executed in the Sargent workshops by experienced metal workers whose craftsmanship is unexcelled.

In harmony with the use in modern buildings of different metals and finishes, the standard designs can be supplied in bronze and brass in natural colors and in the established architectural finishes, also in white bronze, silvery in tone and the same color all through. Combinations of two metals or finishes can also be furnished for some of the designs.

For large and important work we are prepared to cooperate with architects in the production of hardware in special designs harmonizing with the architectural style of the building and carrying out the ideas of the architect.

Door Knob No. 1822 MD
2¼ Inches

Escutcheon No. 7876 MD
10¼ x 3 Inches

Door Knob No. 1882 M D
2¼ Inches

Escutcheon No. 7876 M D
10¼ x 3 Inches

Door Knob No. 1822 M H
2¼ Inches

Escutcheon No. 7876 M H
